Experiences & anecdotes

12/16/2022 - In my early birding days, I would go birding with the local Audubon in Los Angeles often at Playa del Rey. I remember we would meet near the parking lot next to the lagoon. Birds like the Great Blue Heron and Great Egret could be seen stomping around in the shallow water. There were many tall trees along the water's edge and the herons loved to nest high up in the canopy.

These birds have a wide range, coast to coast, from Mexico up to Canada. Everywhere I've lived, these birds have been a familiar face whenever I'm near water. I often see them hunting in the water or standing around observing their surroundings. Their large size and deliberate movements make them easy subjects to photograph.
